It indicates the range of speeds which are at or below the aircraft's stall speed at the maximum lift coefficient (i.e. the speed below which the aircraft cannot fly). MotoCalc - 1.. Introduction The properties and applications of carbon nanotubes (CNTs) and related materials have been very active research fields over the last decade , , . CNTs possess high flexibility, low mass density, and large aspect ratio (typically >1000), whereas predicted and some

experimental data indicate extremely high tensile moduli and strengths for these materials. Carbon nanotubeâ€“polymer composites: Chemistry, processing ... -
