State variables are variables whose values evolve through time in a way that depends on the values they have at any given time and also depends on the externally imposed values of ... Tue, 19 Feb 2019 16:34:00 GMT Peer Reviewed Journal - IJERA.com - Overview. Rise time is an analog parameter of fundamental importance in high speed electronics, since it is a measure of the ability of a circuit to respond to fast input signals. There have been many efforts to reduce the rise times of circuits, generators, and data measuring and transmission equipment.
