Playing the 6 string banjo is similar in many ways to the guitar. They are both tuned the same. Fri, 08 Mar 2019 02:02:00 GMT Fun With the 6 String Banjo - Steve Kaufman - New functions within SQL Server 2016 allow you to combine dynamic SQL statements & String_Split, allowing you to take a list of strings & parse them into rows. Now Presenting: Fun with Functions (String_Split) Now Presenting: Fun with Functions (String_Split) - String s1 = new String("Java is fun!"); String s2 = new String(s1); Clearly, two String objects have been instantiated, because the constructor String() appears twice. In the second line the argument passed to the constructor is s1 . The effect is to instantiate a new String object and initialize it with a copy of the data in s1 . Strings - York
