Tue, 16 Apr 2019 10:27:00 GMT increasing small arms lethality in pdf - The Lightweight Small Arms Technologies (LSAT) program is funded by the U.S. Joint Service Small Arms Program, with the goal of significantly reducing the weight of small arms and their ammunition. Following a series of military programs to investigate advances in small arms (SPIW, Future Rifle, ACR, OICW), the LSAT program is the US military's latest project to replace existing US small arms. Thu, 18 Apr 2019 02:47:00 GMT Lightweight Small Arms Technologies - Wikipedia - Green bullet, green ammunition or green ammo are nicknames for a United States Department of Defense program to eliminate the use of hazardous materials from small arms ammunition and from small arms ammunition manufacturing. Initial objectives were elimination of ozone-depleting substances, volatile organic compounds, and heavy metals from primers and projectiles. Tue, 16 Apr 2019 11:17:00 GMT Green bullet - Wikipedia - Interesting work. It struck me that since the analysis showed that the fatal cases in this sample involved roughly twice as many wounds on average as the non-fatal cases, the likely additional traumatic and ballistic effects (e.g. blood loss, vital tissue damage,

etc.) of those additional wounds raises a significant question concerning what effect the increased caliber had versus the ...
