Switched-mode power  
supply - Wikipedia - The  
cathode-ray tube (CRT) is a  
vacuum tube that contains  
one or more electron guns  
and a phosphorescent  
screen, and is used to  
display images. It  
modulates, accelerates, and  
deflects electron beam(s)  
onto the screen to create the  
images. The images may  
represent electrical  
waveforms (oscilloscope),  
pictures (television,  
computer monitor), radar  
targets, or other  
phenomena. Cathode-ray
